About me

Enjoy walking and playing with my dogs and watching movies with my friends. I discovered a passion for creating and developing software to contribute to creating a connected world. I love working as a team, learning from others, and keeping myself in constant learning.

SCRUM FUNDAMENTALS

Education

Full-stack Developer
Javascript

Kodemia
Oct. 2021- Apr. 2022

Engineering in Business management

Tecnológico Mario Molina
Campus Zapopan
2015-2019

Experience

Software Engineer
Govos Mexico

Hibrid
Jan-2025 - Current

Software Engineer
Global Logic

Remote
Aug-2023 - Jan-2025

Software Engineer
EPAM systems

Remote
May-2022 - Aug-2023

Full-stack Developer
Kodemia

Remote
Oct-2021 - Apr. 2022

Material Planning
Analyst
Flex

Guadalajara, Jal.
Mar. 2021 - Oct. 2021

Soft skills

- Teamwork
- Proactive
- Problem solving
- Creativity and innovation
- Self-taught person
- Abstract thinking

- Working on strategies for migration from a legacy site to a full **react** app site.
- Implementation of best practices to develop sustainable new code.
- creation and design of **CI/CD** processes with github actions for a testing environment
- used **typescript, react query, tanstack table & axios** as some of the main libraries.
- Generation of **unit testing** for react components
- Working on strategies for migration from a legacy site to a full **react** app site.
- Implementation of best practices to develop sustainable new code.
- creation of workflows using **GitHub actions** in order to create a proof of concept.
- handle global state management with **redux toolkit**.
- used **CSS modules & internal Design system**.
- used **typescript, react query, tanstack table & axios** as some of the main libraries.
- Generation of **unit testing** for react components
- Development, Integration & Configuration of Salesforce Platform.
- Development of **lightning web components** to develop UI of web apps.
- Customization of applications according with the requirements.
- Tasks automation by **apex code, SOQL, SOSL, Javascript, Triggers & API** integration in Salesforce.
- Creation of new **Flows , validation rules**, creation of **Digital experiences web pages** for external users.
- Development of web app from ideation, design, and deployment using technologies like **HTML, CSS, Tailwind, React.js & Typescript** for the Frontend and **Node.js, ExpressJS & MongoDB** for the Backend and, finally using AWS for deployment.
- Generation of **unit testing** for react components
- Development of web app from ideation, design, and deployment using technologies like **HTML, CSS, Bootstrap & React.js** for the Frontend specially used **Next.js** using particular functions such as useRouter to move through the pages and **Node.js, ExpressJS & MongoDB** for the Backend creating a full rest API following a clean architecture and using asynchronous functions to define the use cases and logic. Finally using **IBM cloud & AWS** for deployment specifically in **AWS** using **ElastikBeanstalk** for the creation of the instance with **EC2 and certificate manager** for the request of the SSL certificate and finally using **code-pipeline** to configure the automation of the deployment (CI/CD).

- Creation of automated reports with visual basic to achieve the goals proposed in the quarter.
- Automation reporting using kinaxis and scripts with javascript for daily support in the materials team.
- Assisting in auditing data for accuracy and preparing summary reports based on the analysis of data.
